postoffice in Roy, New Mexico.

The world has now but four occupations fighting making war materials raising food and transportation. Everything else has stopped. I am also surprised to learn that of those engaged in fighting but (perhaps) 5 per cent are actually employed at any one time. The other 95 per cent are building camps and roads, bringing up supplies waiting getting ready for or resting from a battle. So in the advanced zone there is the Sunday quietness most of the days.

Food

Representative Kahn ranking Republican member of the House Military Affairs Committee, observes the New York World, administered a well deserved reproof to Representative Campbell Kansas Republican who had charged in the House that there was graft in the building of cantonments. "Does the gentleman know of any graft?" he asked. "It is his duty to notify the proper officials of the Government if he does."

The admonition was timely and of general application.

Exhorting the beauties of the kind of taxation which in olden times went by the name of Morgan McKinley Dingley and Payne Aldrich, Representative Fordney ranking Republican member of the House Committee on Ways and Means says:

"Tariff is the easiest tax in the world for the people to pay because when they pay it they do not know it. There is where the Republicans have the advantage over you Democrats in imposing taxes upon the people".

If Mr. Fordney can devise a scheme of taxation by which the people of the United States will pay without knowing it the billions needed yearly for war purposes we think we can assure him immortal fame.

Should you ever write a dictionary put in this: "Soldier-One who always growls at trifles and smiles at real difficulties and dangers"

The Libert Motor Tested

"We were darting through space at 130 miles an hour when we drove through a fleecy cloud six thousand feet above Dayton. I didn't know it then but Howard Rinehart the pilot, told me so afterward. That cloud was a symbol.

In Washington the day before an aeronautical "authority" had called me aside to give me grave counsel in this manner: "Don't let them fool you. I have reason to believe that no Liberty motor has ever been in the air yet." Then he told me how no good aviation motor could be made by machine processes.

The thunderous buzz of the mighty motor that was now projecting us through the air at a rate at which few men had ever flown before was the answer.

We were shooting through the cloud of ignorance regarding the Liberty motor. The reticence of the Signal Corps, the yeal abilities of the enemies of the motor and the well known difficulties that have been encountered in its production have created a generally believed legend of the failure of the Liberty motor.

Seeing is believing. The legend was being demolished at better than two miles a minute.

The motor that was developing

this speed was just plain Packard production Liberty motor No 533 Three or four weeks ago it was a pile of about 3,000 parts. These parts had been quickly put together at Detroit rushed to Dayton placed in a De Haviland 4 and now the composite was climbing the stairs of the skies faster than the finest handmade motor the wonderful machinists of France, England and Italy have ever produce. And they said it couldn't be done. The wiseacres have been telling the public that after all the Liberty motor would not develop speed that it is only a mediocre creation at best but here we were shooting through the blue in a two-seater faster than any German ace has ever sped horizontally in a single seater and faster than any of the Allied fighters have ever flown in action. The enormous power of the Liberty motor in proportion to its weight has given us a two-seater that can outrun and outfight the very pursuit machines for our failure to develop which there has been so much criticism

This is another chapter of the legend that has enshrouded the Liberty motor. It is the most powerful flying motor the world has yet developed. It can climb with unprecedent rapidity in the right sort of plane and it can over haul or run away from any enemy. It gives a two seater plane every advantage over a single seater except in the matter of quick manoeuvrability.

But greater than its merits as a motor is the manner of its production by machines. It thereby solves the problem of supply. The time is comparatively near at hand when the six factories that are now at work on it will be able to turn it out at the rate of 500 a day or 12,500 a month.

Finger nail Statistics.

It has been estimated by a scientist that in a lifetime of 70 years a man grows nails which, if it were possible to preserve them uncut, would reach a length of 7 feet 5 inches.

cause of America for the
period of the war

EN EL FUTURO LA INDUSTRIA
DEL TRIGO SERA SOMETIDA
A LA DIRECCION DEL
GOBIERNO.

De hoy en adelante la Industria del trigo en el estado de Nuevo Mexico Será bajo el dominio del gobierno; es decir que para que lleve el entero precio fijado por el gobierno, el trigo tendrá que presentar las cualidades indicadas por el departamento de agricultura, y todos los compradores de trigo tendrán que equiparase con aparatos de análisis y de tamices del gobierno para clasificar los diferentes grados de grano. Se establecerán precios uniformes para cada clase de trigo y también de harina.

Se decidió este asunto en una convención de molineros, productores de trigo y comerciantes de trigo que se celebró en respuesta a la convocatoria de R. E. Putney, jefe de la división de harina y molinera en general de la administración de alimentos y a la que asistieron unos cien hombres, entre los cuales se encontraban una mayoría de hispano-americanos, presentando el mayor número los condados de Valencia y Sandoval.

Se llamó muy particularmente la atención a los mejores métodos de trilladura y a la introducción en cuanto sea posible del trillo para reemplazar los animales que, en ciertos puntos, hasta hoy día, han hecho la trilla de granos. Se debe eliminar la causa de pérdida de grano en la operación de la trilladura y, de hoy en adelante, todo el grano tendrá que ser limpiado y propiamente clasificado según su calidad. Esta innovación del gobierno permitirá que el agricultor cultive y venda mejor trigo, reciba por el precios más regulares y también que se venda la harina a precios establecidos y uniformes. Entretanto, la gran necesidad es cultivar y moler lo más posible su propia harina para proveer a los soldados americanos y sus aliados en Francia.

SE PIDEN CULTIVOS Y COMAIS
LEGUMBRES.

Cultivo Vd. y coma la mayor cantidad posible de hortaliza durante este verano; eso se le pide a Vd. el administrador de alimentos. El comer alimentos de hortaliza, frutas y sujetos a una rápida pérdida, economiza los alimentos conservados en cajas y demás alimentos de exportación para los aliados y los soldados americanos. Se pide el cultivo en cada casa de un jardín donde sea posible producir siquiera tan poco como un puñado de rábanos. A los mercaderes de víveres se les pide hagan todo su posible para vender la mayor cantidad de legumbres en estado fresco.

CADA BUSHEL DE TRIGO
EQUIVALE A UN SOLDADO

Cada bushel de trigo ahora economizado en este país equivale a la munición de un soldado en el frente de batalla hasta la próxima cosecha. Dado que el soldado no puede vivir sin alimentos, cada bushel de trigo es la actual representación de una unidad combatiente. El número de hombres que podemos enviar a la batalla depende del número de hombres que podamos alimentar en el frente.

CHIEF OF AMERICAN HABITS

Telephone Is a Day and Night Requisite; Both a Commercial and Social Convenience.

El Presidente Wilbur de la Universidad Leland Stanford, la Señorita Ida M. Tarbell, y la Señorita Martha Van Rensselaer, jefes de economía doméstica respectivamente del Comité de la Mujer del Consejo Nacional de Defensa y de la Administración Federal de Alimentos en Washington estarán unos de los conferenciantes al gran Congreso de Madre-Hija en Albuquerque los 24-29 de junio, el cual presentará unas 800 mujeres del estado. El Presidente Crile y el Director Cooley del Servicio de Extensión y los profesores del Colegio de Estado, la Señora Walter Danburg del Comité de la Mujer, la Señora W. E. Lindsey, la Señora Ruth Miller, jefe del servicio de Economía Doméstica de la Administración de Alimentos, todos cooperarán con la administración de alimentos para hacer de la semana de demostración una semana "ganadora de la guerra".

Se operarán a toda fuerza tres casas de demostración en la Armada, y el Congreso será una escuela intensiva de cocina de guerra. La Administración de Alimentos, el Colegio de Estado y el Comité de la Mujer presentes designarán cien partidas de una madre y una hija cada uno; serán representados todos los clubes de muchachos y muchachas y habrá también muchos otros delegados. Los ferrocarriles en esta ocasión extenderán boletos a precios reducidos.

A LAS LOGIAS SE LES PIDEN AYUDAS EN ECONOMIZAR EL TRIGO.

Muchas organizaciones fraternales en varios estados se han juntado al ejército de los que economizan trigo firmando la promesa de "sin-trigo." La Administración de Alimentos mucho desea que las logias de Nuevo México se valgan de sus facilidades de organización para asistir en la gran campaña cuyo fin es siempre de enviar a Europa todo el trigo posible, y a dichas organizaciones fraternales se les urge que en todas sus reuniones hagan algo en este sentido.

Packages containing dutiable gifts sent to members of the expeditionary forces temporarily serving in England will be delivered free of duty, provided the contents contain bona fide gifts, the quantity is not beyond the personal requirements of the addressee, and that the parcels are addressed for delivery to the regimental address of the recipient.

In each school the children submitting the best speeches are to deliver them in public. According to plans the boy or girl awarded first prize is to get a certificate from the United States government as a Junior Four-Minute Man.

Plans have been announced for the organization of "Junior Four-Minute Men" in every school in the country. According to the division of Four-Minute Men of the committee of public information, bulletins especially prepared for school children will be sent during the third Liberty loan campaign for distribution by superintendents to all schools in the United States. Addresses will be prepared from the material in these bulletins just as regular Four-Minute speakers in motion-picture houses prepare their own speeches from bulletins supplied by the government.
